IN THE CLAIMS

The following is a complete listing of revised claims with a status identifier in parenthesis.

LISTING OF CLAIMS

1. (Previously Presented) A connection device comprising: one or more processing units; and

an optical switch adapted to connect at least one of the units to one or more non-amplified optical signals based on a characteristic of each signal.

- 2. (Original) The device as in claim 1 wherein the at least one unit comprises a Raman pump.
- 3. (Original) The device as in claim 1 wherein the at least one unit comprises an optical-to-electrical-to-optical regenerator.
- 4. (Original) The device as in claim 1 wherein the at least one unit comprises a dispersion equalization/compensation unit.
- 5. (Original) The device as in claim 1 where the at least one unit comprises a performance monitor.

6. (Previously Presented) A router comprising:

one or more processing units; and

an optical switch adapted to connect at least one of the units to one or more non-amplified optical signals based on a characteristic of each signal.

- 7. (Original) The router as in claim 6 wherein the at least one unit comprises a Raman pump.
- 8. (Original) The router as in claim 6 wherein the at least one unit comprises an optical-to-electrical-to-optical regenerator.
- 9. (Original) The router as in claim 6 wherein the at least one unit comprises a dispersion equalization/compensation unit.
- 10. (Original) The router as in claim 6 wherein the at least one unit comprises a performance monitor.
- 11. (Previously Presented) A method for providing an optical, service-enabled connection comprising:

connecting at least one of a number of processing units to one or more non-amplified optical signals based on a characteristic of each signal.

- 12. (Original) The method as in claim 11 wherein the at least one unit comprises a Raman pump.
- 13. (Original) The method as in claim 11 wherein the at least one unit comprises an optical-to-electrical-to-optical regenerator.
- 14. (Original) The method as in claim 11 wherein the at least one unit comprises a dispersion equalization/compensation unit.
- 15. (Original) The method as in claim 11 wherein the at least one unit comprises a performance monitor.
